Education

KCMIT, Kathmandu, Nepal

Expected 2025

Bachelor's in Computer Applications

Relevant Coursework: Database Management, Web Development, Software Engineering

Experience

Orgo (Contract)

March 2024 – Present

Full Stack Developer

- Developed complex aggregation pipelines with Mongoose for MongoDB, improving query performance by 25%.
- Optimized web applications using react-query, reducing API call failures by more than 20%.
- Implemented white labeling features, enhancing product customization.

Hyperce (Remote)

August 2023 – Present

Full Stack Developer

- Led a team of 4 junior developers, increasing their productivity through mentorship and training.
- Developed and maintained a portfolio of six e-commerce projects, ensuring their functionality, performance, and usability met business requirements.
- Ensured smooth operation by bridging communication between backend developers, managers, and DevOps.

Unisala (Remote)

July 2023 – April 2024

Frontend Developer

- Spearheaded the development of an EdTech project, enabling university search and filtering.
- Improved code quality and maintainability by converting a project from JavaScript to TypeScript.
- Enhanced application performance with robust state management using Redux.

Channakya Software, Kathmandu, Nepal

September 2022 – June 2023

Full Stack Developer Trainee

- Advanced from intern to trainee developer through demonstrated skill and initiative.
- Developed a task management system using React and Radix UI.
- Published several reusable UI components to npm, enhancing code reuse and collaboration.

Selected Projects

Instagram Clone

Developed a feature-rich Instagram Clone using React for frontend, Express for backend, and MongoDB for the database. See Live

Astral Care

Crafted a dynamic website for an Australian home care service company using React and Framer Motion for an interactive User Experience. See Live
